Russian proposals to the zero draft report of Main Committee 2

p.3: In the second sentence we propose to delete the phrase starting with «including threats to use…».

We consider p.8 redundant because its text in many ways repeats the provisions of several other paras, for instance - pp. 2 and 3. We propose to delete this para.

p.13: We propose to add the following wording in the end of the para: “The conference notes that the state that presents suspicions of non-compliance must be ready to defend their point of view in the policy-making bodies of IAEA. The Conference underlines that attempts to use false and politically motivated accusations undermine the NPT and pose a serious threat to the non-proliferation regime”. Moreover in the third line from the end of the para we propose to delete the word “investigate”.

p.20: In the last sentence we propose to delete the wording “and that those measures are an integral part of IAEA safeguards”.

p.21: We propose to delete the following language: “or applied provisionally”.
p.35: We propose to delete the wording “including through the development and implementation of State-level safeguards approaches in close consultation and coordination with State and/or regional authorities”.

p.45: In the end of the second sentence we propose to delete the following language: “and the continued maintenance of its incident and trafficking database”.

p.55: We propose to add the following text in the end of the para “including unilateral sanctions imposed on the basis of export control lists”.

p.60: In the beginning of the second sentence we propose to add the wording “the parties to the Treaty” after the word “encourages”.

p.63g: In the end the para we propose to add the following language: “bearing in mind the voluntary nature of additional protocol”.
