Proposal by Sweden on the draft report of Main Committee II

New proposed text in bold face below.

**Paragraph 33:**

33. The Conference expresses grave concern for the military activities being conducted near or at Zaporizhzya nuclear power plant in Ukraine, including its impact on the safety and security of that facility, and the loss of control over the plant, **as well as other Ukrainian nuclear facilities within Ukraine’s internationally recognized borders**, by the competent authorities of Ukraine, which prevents the State and the IAEA from ensuring that safeguards activities can be implemented effectively and safely. The Conference expresses its appreciation for the efforts of the Director General of the IAEA to enable the IAEA to undertake urgent safeguards activities to verify the status of the reactors and inventories of nuclear material to ensure non-diversion from peaceful use.

**Forward-looking action item f:**

The Conference calls for the restoration of control to the competent Ukrainian authorities of the Zaporizhzya nuclear power plant, **as well as of all other seized nuclear facilities within Ukraine’s internationally recognized borders**, in order to ensure its safety and security, as well as the effective implementation of IAEA verification activities at this plant under Ukraine’s comprehensive safeguards agreement.
