Proposals by Argentina and Brazil on the draft report of Main Committee II
(NPT/CONF.2020/MC.II/CRP.1)

P25bis. The Conference notes that bilateral and regional safeguards, such as those implemented by EURATOM and ABACC, can play a key role in the promotion of transparency and mutual confidence between States, and that they constitute a reference of best practice in nuclear safeguards and non-proliferation verification. [language from para 21 of the 2010 Final Document, combined with OP3 of resolution 76/52]

P29. The Conference emphasizes that naval nuclear propulsion is permitted under the NPT and requires the application of the highest standards of non-proliferation and the relevant provisions of the safeguards agreements for the development of specific verification procedures to be applied for that purpose by the IAEA and, as appropriate, regional verification agencies.

On the Nuclear Suppliers Group - NSG:

49bis. The Conference notes that export controls under the Nuclear Suppliers Group (NSG), based on its technical nature and mandate, are a key component to the nuclear non-proliferation architecture, guaranteeing the access through trade to nuclear technology in a safe manner for peaceful purposes, and assuring that such trade does not contribute directly or indirectly to the proliferation of nuclear weapons.
