Proposal by Sweden on the draft report of Main Committee II - Paragraph 51

New proposed text in bold face below.

Paragraph 51:

51. The Conference recognizes that sound national laws and regulations of States parties are necessary to ensure that the States parties are able to give effect to their commitments with respect to the transfer of nuclear and nuclear-related dual-use items to all States taking into account articles I, II and III of the Treaty, and for States parties, also fully respecting article IV. In this context, the Conference urges States parties to establish, maintain and strengthen the effectiveness of national laws and regulations for export controls of such items. The Conference welcomes States parties increasing adherence to multilaterally negotiated and agreed guidelines and understandings, such as those published by the Nuclear Suppliers’ Group and the Zangger Committee respectively, in developing their own national export controls.
