IV. Decisions and recommendations

20. The Meeting thanked the United Kingdom of Great Britain and Northern Ireland for its efforts that led to the adoption of General Assembly resolution 76/47 entitled “Implementation of the Convention on Cluster Munitions”.

21. The Meeting underscored the obligation of States Parties never under any circumstances to use cluster munitions and, in accordance with the object and provisions of the Convention, condemned any use of cluster munitions by any actor. In this connection the Meeting expressed its grave concern at the increase in civilian casualties and the humanitarian impact resulting from the repeated and well-documented use of cluster munitions since the Second Review Conference. This grave concern applies in particular to the use of cluster munitions in Ukraine.

22. The Meeting took stock of the implementation of the Convention and progress made since the Second Review Conference and welcomed the Progress report on the implementation of the Lausanne Action Plan, which covers the period 3 October 2020 to 30 June 2022.

23. The Meeting expressed its appreciation for the efforts made by the Philippines and Spain as Coordinators on Universalisation for coordinating with various key partners on strategic efforts to enhance universalisation and for widening the membership of the already existing informal working group (IWG) on universalisation to all interested States Parties. The Meeting reiterated that Universalisation is the joint responsibility of all States Parties under the leadership of the Presidency and in coordination with the thematic Coordinators.

24. The Meeting thanked the President for the work undertaken, in cooperation with the Coordinators on universalisation, to promote the implementation of the recommendations on initial actions contained in the paper “Ways Forward on Universalisation of the Convention on Cluster Munitions” (CCM/CONF/2020/12), which had been endorsed by the second Review Conference.

25. The Meeting took note of the work of the President in engaging with States Parties implementing obligations under Article 3 or 4 or retaining or transferring cluster munitions in line with Article 3.6 and 3.7 having omitted to submit an Article 7 report for two consecutive years, in close cooperation with the relevant Coordinators, as mandated by the Second Review Conference.

26. The Meeting welcomed the continued progress in stockpile destruction which had led to one State Party, Guinea-Bissau, clarifying that after verification activities, it could confirm that it did not have any cluster munition stockpiles in its inventory. The Meeting thanked Bulgaria and Australia, Coordinators on Stockpile Destruction and Retention, for the diligent follow-up efforts with the remaining four States Parties with destruction obligations under Article 3.

27. The Meeting assessed the request submitted by Bulgaria for an extension of its deadline to complete the destruction of all its cluster munition stockpiles in accordance with Article 3.2 of the Convention and agreed to grant the request for an extension until 31 December 2023.

28. In granting the request, the Meeting noted that Bulgaria had provided a detailed outline of events that led to a 13-month disruption of its destruction activities. The Meeting also noted that Bulgaria had provided a revised work plan that lent itself to monitoring and had secured all necessary funding to complete the destruction process. The Meeting further
noted that Bulgaria had highlighted that the ongoing war in Ukraine presented a risk to the scheduled transportation and destruction of its cluster munitions.

29. In this regard, the Meeting noted that the Convention would benefit from Bulgaria reporting annually through Article 7 reports and at Meetings of States Parties on the following:

   (a) Progress made on the destruction of its cluster munition stockpiles relative to the projections Bulgaria made in its extension request.

   (b) Updated information on the use of its retained submunitions.

   (c) Other relevant information.

33. In granting the request, the Meeting noted that the provision of a clear work plan and information on the actual contaminated area still to be addressed would make the plan easier to understand and monitor.

34. In this regard, the Meeting noted that the Convention would benefit from Bosnia and Herzegovina reporting annually through Article 7 reports due before 30 April every year and at the Eleventh Meeting of States Parties on the following:

   (a) Progress made by Bosnia and Herzegovina on the implementation of the work plan provided in its extension request.

   (b) Updated information on the contaminated area still to be addressed.

37. In granting the request, the Meeting noted that the non-technical survey (NTS) would inform the extent of the remaining cluster munition contamination to be cleared. The Meeting recommended that Chad regularly report to the Analysis Group on its resource mobilization activities and status, so that the Group is informed of the extent of NTS efforts that can be carried out. The Meeting further recommended that Chad regularly reports to States Parties on the outcomes of the NTS and provides a costed work plan that includes risk education activities, resource mobilization plan, and annual work schedule broken down by month for the next extension period.
38. In this regard, the Meeting noted that the Convention would benefit from Chad reporting annually through Article 7 reports due before 30 April every year and at the Eleventh Meeting of States Parties on the following:

The Meeting thanked the Coordinators on the General Status and Operation of the Convention, Namibia and France, for the General Status and Operation Gender Focal Points Terms of Reference (CCM/MSP/2022/WP.3) and for their important work done in this regard.
